

THEIA TECHNOLOGIES' SY125 LENS SELECTED AS SSI MAGAZINE'S "SHOW STEALER" AT ISC EAST

Sept. 19, 2007 – Theia Technologies

Wilsonville, OR – Theia Technologies' ultra wide angle SY215 lens was selected by Security Sales and Integration magazine as a "show stealer" at the ISC East show in New York. Production samples of the SY125 lens were first demonstrated publicly at the ISC East show Sept. 11th and 12th. "This lens represents a new opportunity for security cameras by offering 'More image for More security'. No other lens can provide such a wide field of view without distortion especially at megapixel resolution, giving superior image quality" said President Jeff Gohman.

Theia Technologies will be demonstrating lenses in booth #4309 at ASIS – September 24th - 27th in Las Vegas. There will be demonstrations of the SY125 lens on megapixel box cameras and in megapixel and analog speed dome cameras.

Theia Technologies was founded in 2006 to develop ultra wide angle lenses. Theia Technologies is committed to enhancing the security of critical infrastructure and high value assets as well as improving the performance of cameras that require wide angle lenses. Theia Technologies has several issued and pending US and international patents for lens technologies.
