

AUTOMATION SOLUTIONS ADDS FANUC AMERICA TO ITS SYSTEMS INTEGRATION LINE

FOR IMMEDIATE RELEASE – March 6, 2017

Beaverton, Oregon — Automation Solutions has announced that it is now an Authorized Systems Integrator for Fanuc America, a world leader in CNC machining and motion control.

“Fanuc is looking forward to partnering with Automation Solutions on future projects,” said Sr. Account Manager, James Farmer. “We are pleased to add another systems integrator to our network who can truly help solve a customer’s needs.”

Automation Solutions designs and builds custom turn-key automation systems, provides systems integration, engineering and design, programming, service and support, consulting and training, and is a reseller and stocking distributor of automation components to original equipment manufacturers and end-users.

“The addition of Fanuc to our integration line allows us even greater capability around robotics and automation, where the use of motion control, CNC machines, drive systems and laser technologies are critical to our client’s success,” said Steve Thompson, Vice President of Business Development. “We are very excited to become a part of the Fanuc integration network, and look forward to working closely with their entire team.”

Automation Solutions is unique in the automation industry – as a single source, they offer engineering and design, component distribution, and custom production/assembly of complex control systems. Since 1997, they have helped manufacture thousands of machines that have been sent all over the world, into every conceivable industry.
