

## D. Mervyn & Associates, LLC | WBE, ESB, DBE #10010 Oregon, WOSB

*Building and strengthening systems and practices to accelerate profits, increase market share, and improve teamwork and communication.*

Founded in 2002, D. Mervyn & Associates, LLC (Mervyn Group) works with executives and managers to improve both individual and organizational communication, as well as performance. Companies come to Mervyn Group when they are ready to achieve their goals concerning quality, on-time-delivery, cost & profitability, and organization effectiveness.

**Mervyn Group's approach is grounded in an assessment of business and operation's process and associated costs.** A cost assessment enables an organization to accurately prioritize improvements and quantify the return on investment for a project or initiative. Specialties and services are focused on thoughtful leadership and grounded in process engineering, quality, and project management.

### Debra Mervyn, Principal

As Principal of D. Mervyn & Associates, LLC, Debra Mervyn works with executives and managers to improve individual and team performance. She enjoys bringing knowledge and understanding to facilitate revenue growth, increase profits, improve communication, and better enable organizations to enter new markets.

Debra Mervyn has a MS degree in Metallurgical Engineering from Columbia University and a BS in Biology from Willamette University. Her post-graduate studies include engineering, quality and project management, lean, and communication and team building.

**Debra's recent experience is focused on assessment and improvement for manufacturing and service organizations.** She specializes in addressing the issues of effective process management for a diverse portfolio of clients. Key examples include the fields of Aerospace and Medical Device. She leads organizations in implementing and obtaining industry certifications.

*"Debra Mervyn provided phenomenal results implementing AS9100 for my electronic manufacturing company. She built an aggressive implementation schedule, then led the team through the project on time and on budget; resulting in a system and strong quality culture repeatedly lauded by auditors."*

-Andy LaFrazia, President, ControlTek
