RLA Engineering is an engineering services firm, founded in 2010, and our core competencies are in electrical, mechanical and software/firmware design engineering and project management. We provide two services: Outsourced Design (OD) and Managed Services Provider (MSP).

## Outsourced Design (OD) Capabilities

RLA assigns a technical asset team which supports a client through all stages of product development: **Concept** → **Design** → **Integration** → **Prototype**

## Managed Services Provider (MSP) Capabilities

RLA provides engineering, technician and project management talent to augment a client's staff to support their in-house design engineering and project management resources. Our MSP fundamentally reduces a client's administrative and managerial overhead costs and increases efficiency across their internal and external product development cycles.

**"You manage the work, we manage the people"**

## Core Competencies

- Mechanical Engineers and Techs
- Electrical Engineers and Techs
- Software/Firmware Engineers
- Project Managers

## Commitment to our Clients

- **Fixed Pricing Model:** We offer an industry leading payment option for the client to draft a simple budget to focus on their own business needs
- **Cost Effective Talent:** We keep our expenses low to pass the savings onto the client
- **Flexibility:** We manage a staffing plan to meet the client's needs
- **Engagement:** We approach a client's business needs as if they were our own and maintain disciplined and regular communication across many metrics
- **Hiring:** We execute professional talent recruiting and HR processes to maintain the highest quality staff to support a client's needs
- **Results:** We will simply do what is needed to fix a client's problem

## Commitment to our Employees

- To recruit and retain (turnover < 5%) the highest quality employees we offer
  - o Competitive Salaries and Benefits
    - Medical, Dental, Vision, Supplemental, 401k and PTO
  - o Continuing Education and Training
  - o Regular Performance Reviews
